Swing-A-Way Series™ Specifications

General Function: Electrohydraulic, power up/gravity down operation

Operation: Hydraulic pump with one lifting cylinder

Control: Module mounted switches, handrail Up/Down/In/Out switches,
optional hand-held control and remote control

Hydraulic: Pressure Max. 2,103 psi (145 bar), Fluid is Univis HVI 26, reservoir is .25 gal (1.0 L)

Construction: Steel structure with powder coat finish

Lift Weight: 245 lbs (111 kg) - 269 lbs (122 kg) (depending on lift model)

Lifting Capacity: 800 lbs (363 kg)

Operating Temperature: 19°F to 149°F (-7°C to 65°C)

Power Supply: 12V DC

Current Consumption: Max. 100A (12V)

Swing-A-Way Series™ Accessories

15606A

Hand-Held
Control Station Kit

Included at no charge when specified on
a lift without door operators.
Controls lift functions only.

34972K

Six-Touch Remote
Control System

34352

Extra Transmitter
for Six-Touch

Controls all lift functions as well as door operators
(if so equipped) (North American Frequency)

800-4000

Side Slide

Door Operator

18633A

Side Slide

Door Operator

92 and up Ford

800-0990A

Harness Extension

For use with slide door operator.
Included at no charge when ordered with
slide door operator.

Swing-A-Way Series™ Features

- fully automatic lift, operated by the wheelchair occupant or an attendant
- rotary design that provides easier access in tight parking situations, allowing less clearance between parked vehicles
- wheelchair user enters and exits the lift platform along the side of the vehicle
- folding down handrail allows easy access
- color-coded rocker switches integrated on the lift
- optional operation by remote control
- side sliding door application (B pillar) only
- the telescopic platform extends as the wheelchair enters the platform and retracts when the wheelchair gets off
- most suitable for manual wheelchairs, or rear wheel power wheelchairs - not suitable for front wheel power wheelchairs
- extended platform available for scooters
- handrail for the convenience of the wheelchair occupant while on the platform
- a "dogleg" handrail is provided with the extended platform, providing extra clearance for scooter tillers
- the handrail also acts as a locking mechanism, preventing the platform extension from moving when ambulatory passengers exit vehicle
- hydraulic outboard, that will be in the fully up position before the platform leaves the ground
- integrated back-up pump
- designed for use with automatic slide door operator
- durable high-gloss powder coated finish
