

Vangater II Series™ eBrochure

The innovative Vangater II Series at once solves the problem of wheelchair access and ambulatory entry with a power tri-folding platform. Over half the van's side door is available for easy ambulatory exit and entry when the lift is in the stowed position. But the touch of a button quickly unfolds the platform, revealing a fully functional wheelchair lift in a compact package.

The Vangater II Series wheelchair lifts are fully electric in operation, for both the fold/unfold and up/down cycles. Lift operation is controlled by the standard hand-held control, the on-lift controls, or the optional remote control.

The Vangater II Series is designed for installation in the side or rear doors of personal-use full-size vans. See Application Guide for installation details on stepwell and flat floor models. A model is also available for installation in minivans, see Application Guide for details.

Tri-Folding Platform for Ambulatory Access

	Vangater II Series™
Platform Width	76 cm
Platform Length	109 cm & 119 cm
Lifting Capacity	272 kg
