

# VL997 Vista Series™ eBrochure

The VL997 Vista Series offers an innovative solution for both wheelchair users and ambulatory passengers. The split platform automatically folds in half when the platform is stowing, allowing clear access for both passengers and cargo. For your safety, the spring-loaded roll stop reliably deploys when the platform reaches the ground, and returns to the upright position as the platform raises.

The VL997 Vista Series lifts are fully hydraulic in operation, for both the fold/unfold and up/down cycles. Lift operation is controlled by the standard hand-held control, the on-lift controls, or the optional remote control.

The VL997 Vista Series is designed for installation in the side or rear doors of personal-use vans. To make your travels more enjoyable, each lift features Braun's Quiet Ride™ system to ensure the quietest possible riding environment.

## Split Platform for Ambulatory Access
